

U.S. Army Aviation and Missile Command "Readiness at the Point of Need"

Mission: To enable AMCOM organizations by providing technical guidance and oversight in the areas of environmental, facilities and property accountability.

Vision: To create an AMCOM work environment that minimizes the environmental footprint; that houses all employees in quality facilities; in which property accountability is a top priority.

AMCOM Logistics/G4

Logistics/G4 supports all AMCOM organizations and consists of two divisions – Environmental, and Engineering and Property. The Environmental Division enhances the procurement, readiness and maintainability of weapon and support systems by minimizing environmental and occupational health risks associated with weapon development, production, operation, sustainment and demilitarization. The Engineering and Property Division facilitates the accomplishment of the overall AMCOM mission by providing required real property, facility, and equipment management and engineering support.

While most G4 employees work behind the scenes to give Soldiers the advantage by reducing maintenance risks and minimizing environmental/occupational health issues, the G4 employees of the Sparkman Management Office at command headquarters at Redstone Arsenal are well known for ensuring the Sparkman Center Complex operates smoothly every day.
