

U.S. Army Aviation and Missile Command "Readiness at the Point of Need"

Letterkenny Army Depot (LEAD)

L EAD consists of skilled artisans who provide support both at the depot and in the field. These skilled workers also support the missions of the U.S. Army Aviation and Missile Command, TACOM, CECOM, and Special Operations Command.

Mission: Deliver superior maintenance, manufacturing, logistics, life cycle support and service worldwide to the Joint Warfighter and our International Partners.

Vision: LEAD is the depot of choice for industry, government and the greatest Warfighters in the world.

Letterkenny Army Depot maintains partnerships with defense contractors to provide the highest quality products and services produced by a highly skilled and dedicated workforce at the lowest possible cost in the least amount of time to meet schedule requirements. LEAD uses a systems approach, which is based on the belief that the component parts of a systems are best understood in the context of relationships with each other and with other systems, rather than in isolation. Systems approach thinking rejects linear cause and effect reasoning and instead focuses on cyclical processes and relationships.
