

# U.S. Army Aviation and Missile Command "Readiness at the Point of Need"

## Theater Aviation Maintenance Program (TAMP) Theater Equipment Package (TEP)

**S**upplying in-theater aviation limited depot maintenance needs with tools, equipment and hardware starts right here at Redstone Arsenal, Alabama. Employees of the AMCOM Logistics Center (ALC) Field Support and Readiness Directorate (FSRD) spend their hours procuring, sustaining, equipping and shipping one-of-a-kind mobile maintenance units that take helicopter maintenance and refurbishment capabilities to the field in support of the Theater Aviation Maintenance Program (TAMP).

**B**ecause of the flexibility of the TEP, each deployed equipment package can be tailored to the needs of the unit at a particular location. The TEP is designed to mobilize within 30 days of notification to be set up and fully operational at a deployed location within a week of arrival.

**T**EP is an aviation specific package designed to support a heavy Combat Aviation Brigade (CAB) in theater working out of our deployed locations. The package consists of standard and commercial off the shelf (COTS) equipment. These are custom-designed Mobile Maintenance Facilities (MMFs) that are equipped with special tools, fixtures, sheet metal equipment, tools and machinery required to repair aviation systems in the field at the Depot level. These units can be used stand alone or connected together to form a complex.
